

It was brought to our attention that from time to time, spam mail is sent through the reindiana.com site. Many individuals have asked why this cannot be stopped but reindiana.com allows the consumer to contact the listing agent if they are interested in a property. It is possible to create spam mail when dealing with a public facing contact form.

There is no way to block scam mail globally without removing the ability for the consumer to contact the listing agent.

Keep in mind that we can report spam mail, and have it blocked once it is reported.

The following email has been reported and will be blocked.

Thank you!
